9. Lot Numbering Information – Cleveland site

Example lot number	CDBG1234
-	

CD = Cleveland. Different sites using SAP will have different two letter codes in their lot numbers.

The remainder of the lot number is two alpha character and four numerical characters -- "XX0000" – creating a unique character string that is the remainder of the lot number.

CDBG1234 is a unique lot number generated by SAP. Lot numbers are generated sequentially; however they are not specific to Cleveland as SAP is an enterprise system. So

BD1234 is older than BF1234 is older than BG1234...

BG1234 is older than BG2345 is older than BG3456...

CDBG1234 is a Cleveland lot, SLBG1235 is a St. Louis lot, and AKBG1236 is an Arklow lot.
